

Nova Systems, an Information and Communication Technology company, was established in January 1981.

Italian company with operations in Italy, Spain, Malta and France, with more than 90 technical experts, it is projected towards all emerging markets to assist its customers in their international growth, with technical offices and professionals ready to guarantee the functionality of information systems worldwide.

Simplifying and integrating corporate processes, applications and systems demands professionalism and infrastructure that can support the objectives of customers. Nova Systems has over 40 years of IT experience in the world of international freight forwarding, transport and logistics, developing software and providing Cloud solutions.

The features of the most sophisticated and advanced Cloud Computing, combined with the completeness of the applications and related services, ensures a global response to the organizational needs of customers. To ensure their increasing competitiveness in the continuously evolving markets, Nova Systems invests significant resources in technology and innovation every year.

The absolute guarantee of company data security and service continuity 24 hours a day, 7 days a week, 365 days a year are just some of the service quality indicators of Nova Systems.

The company adopts an ISO 9001 certified management system and is in the process of obtaining ISO 27001 certification.

Nova Systems is also open to work with other businesses in order to promote the BeOne solution internationally.
