

Nova Systems, an Information and Communication Technology company, was established in January 1981.

An Italian company with branches operating in Italy, Spain and France, with more than 70 expert technicians within the group, it targets all the emerging markets in order to assist its clients in their international expansion with technical offices and professionals ready to guarantee the functioning of information technology systems in all the countries of the world.

Simplifying and integrating corporate processes, applications and systems demands professionalism and infrastructure that can support the objectives of our clients. Nova Systems has accrued more than 35 years of IT experience in the world of international shipping, transport and logistics, creating software applications and providing solutions in the Cloud.

The functions of Cloud Computing are the most sophisticated and evolved, together with the full range of applications and associated services, capable of ensuring a global response to the organisational requirements of our clients. To ensure our clients attain growing competitiveness on markets in continuous evolution, Nova Systems invests significant resources in technology and innovation every year.

The absolute guarantee of the security of corporate data and continuity of service 24 hours a day, 7 days a week, 365 days a year, these are some of the indicators of the quality of Nova Systems' service, certified in compliance with the ISO 9001:2008 standard; in the process of obtaining ISO 27001 certification.

Nova Systems is also open to working with other businesses in order to promote the BeOne solution internationally.
